

Digital escrow and subaccounting built for financial institutions.

Commercial banking needs scalable, compliant escrow and subaccounting. Manual processes like spreadsheets and calls increase risk, strain compliance, and limit growth. ZEscrow replaces legacy methods, letting banks manage complex escrow and subaccounts efficiently at scale.

Maximize

Take the efficiency of your commercial banking team to the next level.

Reduce

Use technology to shoulder the compliance burden for your staff and customers.

Differentiate

Your institution can offer the escrow and subaccounting tools that businesses need.

Attract

Bring in new commercial relationships that represent sticky, low-cost core deposits and loans.

Automate

One elegant system handles busywork, paperwork, and complex regulatory requirements.

Multiply

Your existing customers will bring you more of their business.

**Ready to attract low-cost deposits
and streamline expenses?**

partners@ZSuiteTech.com

Born from a bank, bred to innovate, built to serve.

130+ Clients | USA

Trusted by financial institutions nationwide to support commercial escrow and subaccounting.

Our partner institutions enjoy comprehensive support, including:

- Implementation guidance, project management, and technical consulting.
- Multi-channel institution support.
- New-user onboarding, troubleshooting, and compliance.
- Single-point-of-contact client success consulting for training and business development.

Become the go-to financial institution for specialized commercial niches.

ZEscrow equips commercial banking teams with the tools and confidence to support customers with complex escrow and subaccounting requirements. Municipalities, law firms managing trust and IOLTA accounts, property managers handling security deposits, and other specialized entities benefit from a solution designed for scale, transparency, and compliance.

Industries served by ZEscrow:

"What ZSuite has now done is allowed our cash management salespeople to actively promote escrow as a service with the understanding that it really doesn't matter the size or the amount of money or the amount of accounts. If the system can support it, we can support it."
